PROFILE

First-year Computer Science student at Sheffield Hallam University with strong foundations in programming, software development, and database systems. Proficient in Python, C#, JavaScript, and SQL, with hands-on experience building web and AI-based projects. Demonstrates strong problem-solving, teamwork, and communication skills through academic work and hackathons. Available for a summer internship from 20 May 2026 to August 2026, eager to apply technical skills and gain real-world experience in software development and data-driven solutions.

EDUCATION

Sheffield Hallam University, United Kingdom
Bachelor of Science (Hons) Computer Science **September 2025 – Jun 2029**
On track to First Class Honours | Databases and the Web (89%), Fundamentals of Mathematics and Computer Architectures (84%), Programming for Computer Science (74%)

Multimedia University, Cyberjaya, Malaysia
Foundation in Information Technology **August 2024 – August 2025**
CGPA: 3.84 / 4.00

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, PHP, SQL
Frameworks & Web Technologies: ASP.NET, HTML5, CSS, Bootstrap
Tools & Platforms: Git, GitHub, PostgreSQL, SQLite, MySQL, Supabase, XAMPP, Chart.js

EXPERIENCE

UK Health Security Agency (UKHSA) **March 2026 – May 2026**
Student Software Developer | Client-Based University Project

- Developed a web-based data governance portal prototype to automate dataset access requests, approvals, and permission management workflows.
- Implemented rules-based and role-based access control with audit logging, access expiry, and automated permission revocation using PostgreSQL.
- Built admin and approver dashboards featuring approval queues, request tracking, and search/filter functionality to improve governance visibility and compliance.
- Collaborated in an Agile development team using Jira for sprint planning, task management, and delivery of a client-focused solution for UK Health Security Agency stakeholders.

PROJECTS

Hotel Booking Management System | github.com
JavaScript | PHP | SQLite | Chart.js

- Developed a full-stack hotel booking system with CRUD functionality for managing bookings, guests, rooms, and hotels.
- Designed and implemented a relational database using SQLite, supporting efficient data handling and query operations.
- Built an admin dashboard with data visualisation using Chart.js to monitor bookings and system activity.

Retail Odyssey – AI Fashion Assistant | github.com
Python | Fast API | React | TypeScript | Docker | Gemini API

- Developed a multi-agent AI system using Python and Fast API to deliver personalised fashion recommendations through collaborative agent workflows.
- Integrated real-time product search and recommendation logic with external APIs, supporting intelligent decision-making and user interaction.
- Built a full-stack application with React and deployed via Docker, achieving “Best Use of AI Agents on Arm” at HackSheffield10.

Currency Transfer Application
ASP.NET | C# | MySQL | HTML/CSS | JavaScript

- Developed a multi-currency money transfer platform allowing users to create accounts, transfer funds, and perform currency exchange with daily updated rates.
- Implemented fraud detection and compliance logic, flagging suspicious transfers and suspending accounts until source of funds verification.
- Designed a MySQL relational database to manage user accounts, transactions, transfer limits, and account status, ensuring data integrity and security.

ACTIVITIES

HackSheffield10 - Winner: Best Use of AI Agents on Arm (Awarded by Hackathons UK)

- Developed an AI-powered multi-agent system for fashion recommendations (Retail Odyssey project).

Fully Residential School International Symposium (FRSIS) 2022 – Gold Medal

- Represented Malaysia at an international symposium with participants from Southeast Asia and Turkey, achieving Gold Medal recognition for outstanding performance**.**

Computer Science & Software Engineering Showcase 2026 – First Place

- Awarded first place for presenting the UKHSA Data Governance Portal prototype, recognised for innovation, technical implementation, and project presentation.

UKHSA Townhall Presenter

- Selected by UK Health Security Agency to present the Data Governance Portal prototype at an internal Townhall event to stakeholders and staff.
